

Autism Provision - Further and Higher Education

Introduction

Stirling and Clackmannanshire Councils in partnership with NHS Forth Valley, Service User and Carer representatives and Third Sector Organisations are developing a ten-year plan Autism Strategy, which aims to improve services for people with autism, their families and carers living in Stirling and Clackmannanshire.

The effective development of the Autism Strategy is based on the sound appreciation of the level of support available to people with Autism across ages and level of needs.

To this end, the strategy is conducting a range of surveys sent to organisations and services providers.

This "Autism Provision, Further and Higher Education" survey is about the level of support in place in Further Education. The questionnaire is short and takes only 5 minutes to complete.

The outcomes of the survey will be included in the Autism Strategy released in April 2015 and will be available on the Autism Forth Valley website due to come live in April 2015.

If you have any question regarding this survey, please contact
